OBJECTIVE

Passionate and experienced React Developer with extensive hands-on experience in developing web and mobile application with designing and implementing highly-responsive user interfaces/components by deploying React JS / React Native concepts.

EXPERIENCE

HIRING EXPRESS | FRONTEND ENGINEER (CONTRACT)(REMOTE)
 August 2021 - Present | California, US (1 Year 6 Months +)

A Frontend centric Member of an Agile team to build product from scratch and continuously support current product code and build new features to improve the Customer Experience. Majorly working for their current launched product **Hiring Express**. My responsibilities include:

- Designing and developing new user interfaces for **Hiring Express**.
- Revamping UI, UX and overall design aesthetic for both mobile and web.
- Working Mainly with React, React Native, React Hooks, Redux, Jest, React Testing Library to build/improve UI components and integrations.
- Contribute to Agile best practices by participating in stand-ups, use Jira/Trello to manage tasks, sprint planning, sprint reviews, sprint retrospectives.
- Debugging and testing the existing features. Fixing live issue on priority
- Involved in on boarding and mentoring newcomers/SDEs whenever required.

MOUNTBLUE TECHNOLOGIES PVT. LTD. | SOFTWARE ENGINEER
 February 2020 - July 2021 | Bengaluru, Karnataka, India (1 Year 6 Months)

- 3 Months rigorous training for full stack web development (MERN).
- Developed multiple live projects and clones for WhatsApp, Trello, etc.
- Developed data visualization project for ipl data.
- **Technologies used:** React, React Native, Redux. Node.js, MongoDB, Express.js, Firebase cloud Firestore
- 1 year deployment with **Hiring Express Inc.**
- Worked on developing Product **Hiring Express**.

VAYAM TECHNOLOGIES LIMITED | TRAINEE ENGINEER
 Dec 2018 - February 2019 | Noida, Uttar Pradesh, India (3 Months)

- Worked on a government project **UPCSC**.
- Involved in developing new features and maintaining existing website using php and mysql.
- Worked on the ongoing migration to new user interface and new integrations with back-end services.
